

A LEAN, MEAN PROFIT MACHINE!

EXTREME
TRAILERS

Up to 1,800 lbs. lighter AND up to 50% stronger for extreme profits.

Every pound you remove that you don't need means you can carry more to make more money.

No matter the trailer or the size, you'll get extreme weight savings for extreme payload performance:

EXTREME
TRAILERS

EXTREME PLATFORM TRAILERS
remove a maximum of 1,800 pounds and a minimum of 1,000 pounds.

EXTREME STEP DECK TRAILERS
reduce tare weight by 1,000 to 1,600 pounds.

EXTREME DUMP TRAILERS
many configurations haul the biggest payloads at the lightest tare weights.

ORDINARY TRAILERS ARE TOO HEAVY.

They're not as strong as they should be, either.

We'll show you a better way ... **the Extreme way.** You haul less trailer and haul more payload with Extreme Trailers. The industry's best tare weight, reduced downtime and better back hauls means you make more profit. **Extreme profits that is!**

Extreme Accessories

Extreme-T™ with Straps

- › Extreme-T™ Hook
- › Engages from multiple positions in J-Channel
- › Patent pending for extra safety and security
